

# Vibe Audio Server

AS1-800/3 AS1-1250/6

Colorado **vNet**™  
Life Simplified™

Imagine having instant access to an entire CD collection, from any room in the house, at the touch of a finger. The Vibe Audio Server does the work of an entire rack of audio gear, storing and organizing hundreds of CDs in their original, uncompressed digital format for instant retrieval. Access full AMG metadata to browse by artist, album, song title, genre or custom playlist from any Vibe Color Touchscreen Amplifier, and stream full range, lossless CD-quality digital audio over IP to anywhere in the house.

As a featured component of the Vibe Audio System, the Audio Server is available in two models. Store up to 1250 uncompressed CDs and deliver up to sixteen unique, simultaneous audio streams from a single server (with optional server blades installed). Now everyone in the house can listen to their choice of music, no matter which room they're in.

## Primary Features

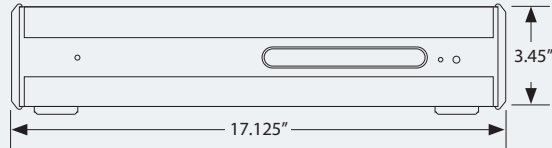

- Streams uncompressed digital audio content over IP
- Store up to 1250 uncompressed CDs
- Up to 16 independent simultaneous audio streams
- Pre-loaded with AMG album metadata
- Rip and store uncompressed CD content from 40x CD reader
- Load audio files directly from your networked PC
- Vibe audio system will continue to operate without Audio Server
- Uncomplicated setup and installation
- A single Vibe Audio Server and Vibe Color Touchscreen Amplifier are all you need for a Vibe home audio system
- Optional AM/FM Tuner Blades provide terrestrial radio broadcasts
